VERIFIED.

More parks for the use of the people: A more free enjoyment of the parks we al-

ready have by the working classes; Better pavements all over the city for the

benefit of commerce : A more strict enforcement of the sanitary laws and ordinances in the tenement-houses

of the city ; A new Broadway by the widening of Elm street and other streets, to relieve the overcrowding of the old Broadway ;

All the electric wires and poles removed from the streets and the wires placed underground :

A more efficient system of rapid transit from the Battery to the Westchester border on both sides of the city.

A Mayor who will favor and push all these improvements with earnestness and vigor. undeterred by prejudice, crankiness, or the fear of increasing the public expenditures.

Let the people remember these wants of the city at the next election.

# THE MAYOR'S BETURN.

Maror Hawrer is back again at his post of duty. It is said that his return was hastened by the subpoena of the Fassett Investigating Committee. It would scarcely have been fitting for Mr. HEWITT to keep the committee waiting for his testimony after rapping it over the knuckles for not proceeding more rapidly with its investigation.

It is not clear what in ormation Mr. Hewirr can afford the committee in regard to the management of the Aqueduct busi-Aqueduct Commission until after the passage of the present law. It is said that the committee wants to find out something concern ing a mysterious letter the Mayor is reported to have addressed to Gov. Hill on the subject of the campaign notes given to the Democratic State Committee by the Governor to aid the election of 1885 But as such a letter if written would only be the opinion of an individual, it would neither expose the mismanagement of the old Acneduct Commission nor be useful in suggesting remedial legislation.

However, the Mayor is again at work, and whatever he says or writes will, as usual, be interesting to the people.

# NOT THE LONE PISHERMAN NOW.

Mr. ROBERT B. ROOSEVELT, our recently appointed Minister to the Netherlands, has signalized the commencement of his diplomatic career by invoking the services of a minister of the Church to lead him out of the gloom of celibacy into the brightness of matrimonial life. Last Saturday the founder of the famous New York Club determined to take "pot luck" for the remainder of his days with Mrs. MARION T. FORTESCUE, the bright culinary star of that jovial association. The marriage took place in London, and we are told that the only New Yorker present was the fascinating Mrs. John BiggLow, who delights in these happy terminations of affairs of the heart.

Mr. Rooseverr is the leading angler in the United States. This time he has cast his lines in pleasant places, and has met with a fitting reward. He will no longer play the part of the lone fisherman in the waters of domestic life. Every one will wish good luck to "Fisherman Bos" and his brilliant and charming mate.

# A CAPTIVE BRIDEGROOM.

The usual order of things is reversed in the matrimonial difficulties that have fallen on LOUIS RAPHARL and the fair SARAH ROSENzeno, who were married in court by a Police Justice last Saturday. Instead of the bride being torn from the arms of her husband by a "cruel parient," the husband has been seized by his angry mother, carried off and locked up in a garret of her residence on Forsyth street, where he now sits mourning for his newly made wife.

- The singular part of the affair is that the

imprisoned Louis is twenty-three years of GRAND CHESTNUT TOURNEY. age, while the bereaved bride-only temporarily bereaved let us hope-is in her eighteenth year. All we can say is that if Louis does not at once break down the door of the chamber in which he is confined, walk out of his mother's house, and claim his bride, he will prove that he is unfit to have a wife. If he has not sufficient manhood to do this, Saran had better get rid of him as speedily as she can.

Yesterday an impertinent reporter, while interviewing Mrs. LANGTHY about her intended trip to California, asked: "Is there any truth in the report that you may return to us entitled to bear another name?" Mrs. LANGTRY, who is the personification of patience and amiability, did not order the presumptuous interviewer out of the house. She blushed, raised her fan and replied : "I have not obtained any divorce. While I remain the wife of Mr. LANGTRY it would be scarcely delicate, to say the least, to discuss the probability of my marrying another man."

There is now no hope for Dan Lyons, the murderer of Athlete Quinn, and this is his last day on earth. His parting from his mother yesterday was an affecting scene, and cannot fail to impress young men with the folly of a career of recklessness and vice. In some respects Lyons was a good son. His associations and indulgences have brought him to the gallows at an ear y age. What a lesson ought his fate to be to his associates! The execution will take place soon after 7.30 to-morrow morning.

Last week an indictment for manslaughter was found by the Grand Jury against a driver whose vehicle ran over and killed a woman on Broadway, at Astor place, six months ago, That is right. Reckless driving ought to be checked. But why should not the men re sponsible for the killing of Mrs. Lavy by the Twenty-third street bobtail car be also indicted? Fair play is a jewel.

The managers of Mr. Blaine's reception at Poland Springs last Saturday took bim to the hotel in a carriage drawn by six black horses. Did not this partake too much of the character of a funeral procession?

A Narrow Escape. A Narrow Escape.

An Irishman who had a mania for elimbing was one day struggling to reach the top of a very high flag-pole. After a hard struggle he succeeded in gaining the top, and was about to place his hat on the apex when he somehow lost his balance and fell to the street. The horrified spectators rushed to the street avecting to see a crushed and lifestreet. The horrified spectators rushed to
the spot expecting to see a crushed and lifeless mass of flesh, but were astonished beyond reas n when the Irishman, with an
agility that was surprising, jumped to his
feet, and feeling carefully in his pocket
drew forth something and remarked with an
anxious look on his face: "B-gorra, I

A Friendly Bru-gist.

A well-known Government official of Washington we will call Mr. J., former, ya Brocklyn boy, was the victim of a little joke. His mother requested him to bring her a dose of castor oil. He went to the drug store and, after asking for it, was engaged in conversation by the druggist, who finally became so friendly that he invited Mr. J. to take a glass of soda water with him. As Mr. J. had re ently moved into the neighborhood he supposed the druggist was inclined to be friendly, and after dricking the soda water and a few minues' clast, said he must go and asked for the oil. The druggist smilingly replied: "You have taken it in the soda water." "Oh!" cried the astonished Mr. J., "it was not for me; I wanted it for my mother."

THE VALUE OF GOOD INK. Important Papers and Records Fade Away

If Penned to Perishable Antita-s The Health Department calls attention to the fact that a large proportion of records of births, marriages and deaths received for filing are written in aniline inks, which will become illegible in a few years. As the originals are now filed as received, certificates written in these fugitive inks will become sheets of blank paper in eight or ten years and valuable records will then be lost.

It is said at the office of the Registrar of Vital Statistics that ministers are more careless in making certificates of marriages than the doctors in reporting births or deaths. On many occasions the blanks have been filled in with a pencil and had to be returned to be written in ink. Ministers are also partial to colored inks, unmindful, doubtless, that the

ink will fade away in a few years.

All records made at the office of the Health
Department headquarters are written with
the best quality of black ink, and it will remain legi le as long as the paper will ast.

At the Register's office Deputy James Marn said it was not often that papers written with aniline inks are brought there, although they are our sionally received. Lawyers gen-er-dly know the necessity of using good black link, and most of the papers received at the Register's office have passed through the

hands of lawyers.

At the Surrogate's office the chief clerk said to an Evening World reporter that whenever any paper is filed in that office, if it is written with analine ink the attention of the person filing the paper is called to the fact, and it is frequently the case, that the papers are refrequently the case that the papers are re-written with black ink.

The number of papers in perishable ink brought to the Surrogate's office of late years is much less than fermerly. Introducing the Guileless Policeman at Moment When He's Off Duty.

What could those strange poises mean? A slap and then a thud of something, then a lighter sound as if some object falling, while there was a hurried rush of feet between whiles.

It was in the rear of the Oak street stationhouse. There is a sort of air-well between the two parts of the station-house and platforms connecting them. The walls are white

The sounds came from the ground floor, which was flagged. The reporter walked to the edge of the platform and looked over. It was not a trag dy. It was not even a stationhouse hardsnip. It was this that he saw:

On one side against the wall were two or three quite elaborate shoe-blacking chairs, one of them filled by a stout civilian who was watching two persons in the little court. One was a boy of surteen, in shirt and trousers, an the other was a stout "cop," also in sers, an the other was a stout "cop," also in his shirt sleeves, with his hat off, and his official blue trousers a little the worse for wear.
